

ABT Technologies Limited signed an agreement with a major strategic global blockchain partner.

ABT Technologies Limited, Addap's is a revolutionary blockchain based web browser that allows users to navigate the online world in a smarter and safer environment, including ABT decentralized browsing web services, multi-tasking and multi screening web interfaces and the ability to create and share multiple web environments.

ABT Technologies Limited is pleased to announce that it has signed an agreement with a major strategic alliance partnership with one of the fastest growing players in the Blockchain space. This agreement will enable ABT to accelerate the adoption browser as the major blockchain browsing solution in the market, enlarging substantially its eco-system and user reach.
